

Neunkirchen, 28/01/2020

**Statement:**

**Virucidal activity of Bacoban WB against the 2019 novel coronavirus (2019-nCoV)**

This statement is based on the following documents of Dr. Brill + Partner GmbH for our surface disinfectant Bacoban WB:

- Modified vaccinia virus Ankara test report (L19/0102aMV.2) dating 26/03/2019
- Summary: Virus-inactivating properties of Bacoban WB dating 26/03/2019

The 2019 novel coronavirus (2019-nCoV) which is responsible for the ongoing 2019-20 Wuhan coronavirus outbreak, is a single-stranded RNA virus with envelope.

Our surface disinfectant Bacoban WB is **effective against all enveloped viruses** according to EN 14476:2013+A1:2015/prA2:2016 (as you can see in the above mentioned documents).

This also includes a virucidal activity against the 2019 novel coronavirus (2019-nCoV).

For the inactivation 2019-nCoV, the following concentration and exposure time are necessary:

1% - 5 minutes
